Professional Summary

Web and IT operations professional with experience since 2021 delivering client websites, managing hosting and domains, administering business accounts, and resolving employee technology issues. Built websites and an internal business platform using PHP, .NET, and AI-assisted development tools. Combines hands-on technical delivery with client requirements management and coordination across business teams.

Core Skills

Website Development | PHP | .NET | Hosting and cPanel | Domains and DNS | Google Workspace | Microsoft 365 | Technical Support | Requirements Gathering | AI-Assisted Development

Professional Experience

Wida Company | Programmer

March 2024 – Present | Scope includes digital account delivery, web development and IT operations

- Developed and deployed client websites and the Wida internal platform, covering requirements, implementation, hosting setup, and subsequent updates.
- Managed and maintained 20+ client websites and hosting environments; administered domains, DNS records, and cPanel hosting for 30+ client accounts.
- Configured business email and user accounts through Google Workspace and Microsoft services; resolved employee computer, email, and Drive issues.
- Translated requests from clients and internal departments into technical tasks, coordinating requirements, reviews, approvals, and delivery.

Riadh Al Afkar Company | Programmer

November 2021 – March 2024 | Scope includes client accounts, websites and technical support

- Created, deployed, updated, and administered company and client websites, domains, and hosting services.
- Set up client digital accounts and business email services, and supported staff with day-to-day technology issues.
- Managed client requirements and coordinated creative production, approvals, publishing, and translation delivery.

Selected Projects and Client Work

Wida Internal Business Platform

digital.wida.sa/workspace

- Designed and developed an internal platform bringing employee service requests, departmental routing, attachments, status tracking, and approvals into one workspace.
- Implemented request assignment, approval or rejection, clarification requests, and role-based access to services and information.
- Built modules for disbursement requests with approval tracking and digital signatures, subscription and domain renewals, employee equipment and work accounts, and office seating and device locations.
- Created a management dashboard showing pending actions, upcoming renewals, subscription counts and costs, with access to detailed records.

Client Website Portfolio

Independently designed, built, deployed, and launched the following websites:

rakeen.me | etika.me | bilda.sa | alfayez.sa | web.tajagri.sa/index.php | makhazenalenaya.sa

Selected Client Engagements Delivered Through Employers

- Ministry of Hajj and Umrah: coordinated content production, approvals, and publishing using Buffer and Hootsuite; managed translator handoffs and multilingual publishing workflows covering 17 languages.
- MODON: set up a domain and dedicated Drive environment, administered users, and coordinated social content translation and publishing across four languages.
- Aromatic, Rasma, and Rasees: administered products and pricing on Zid, coordinated design and video deliverables, obtained client approvals, and published social content.
- Makhazen Alenaya: built the website and coordinated content preparation, review, and social media publishing.
- Weqaa, Nusuk Hajj, Umrah and Ziyarah Forum, and the Authority for the Care of Persons with Disabilities: managed client accounts and followed up on requested work.

Education and Training

Bachelor of Computer Science | Misr University for Science and Technology | 2019
